Continuation of 2. NOTE:

The proposed amendment filed 3 November 2003 (Paper No. 8), if entered, would newly add the limitation, "the slit remaining on the sensor substrate and having parallel slit portions which are provided at both sides of each of the strain sensors to form an intersecting area of the sensor substrate between the parallel slit portions; wherein the slit induces an increase in an amount of deformation generated in the intersecting area" to independent claims 1, 14, and 15.

Such limitations, if incorporated into claim language, would dramatically alter the scope of the present invention, requiring additional search and consideration. By such reasoning, nonentry of the proposed amendment is deemed proper and necessary at this time.
